Notice of Public Workshops

Web Posting Date: September 26, 2007

The Bureau of Corrective Actions of the Nevada Division of Environmental Protection is proposing amendments (R125-07) to the release reporting provisions of Nevada Administrative Code 445A.345 to 445A.348. Public workshops will be held October 23rd, 24th, and 25th, 2007 to discuss the proposed changes. The proposed regulation can be viewed on-line at:

<http://www.leg.state.nv.us/Register/2007Register/R125-07I.pdf>

The proposed revisions provide for a category of release events involving hazardous substances that will become subject to immediate notification requirements to the Division. These include releases of a chemical hazard in excess of Federal reportable quantities, releases to surface water, and threats to vulnerable resources and populations. The revisions also eliminate inconsistencies in the reportable quantities and reporting triggers for release events involving petroleum products and other hazardous substances and pollutants. The proposed revisions also clarify provisions of release reporting regulations that deal with the determination of when a release or the discovery of a historic release becomes reportable.

The public workshops will consist of a brief presentation of the proposal by the Division, followed by a question and answer period. Workshops will be held at the following locations and times:
